Tender No. MSTC/BLR/COCHIN PORT TRUST/12/WILLIGDON ISLAND/18-
19/14458 Dated: 28.12.2018

ADDENDUM

The following is added to clause No. 3.1.4, Section-3, Instructions to Tenderers in the tender No MSTC/BLR/COCHIN PORT TRUST/12/WILLIGDON ISLAND/18-19/14458 dated 30.08.2018.

The indicative rate for supply of cold energy by PLL for the warehouse is as follows as informed by PLL.

Based on the inlet and outlet refrigerant (glycol water) parameter at the battery limit of PLL, cold energy load will be estimated and converted to electrical load and monthly/annual electrical energy consumption will be calculated. PLL would then apply a rate per unit (KWH) equal to 75% of KSEB's commercial tariff ~~±~~T-VII (A) for above 500 units per month with annual escalation of 5%.+ However, this is only for information and CoPT is in no way responsible for the contract between PLL and the lessee for the arrangements for the cold energy.
