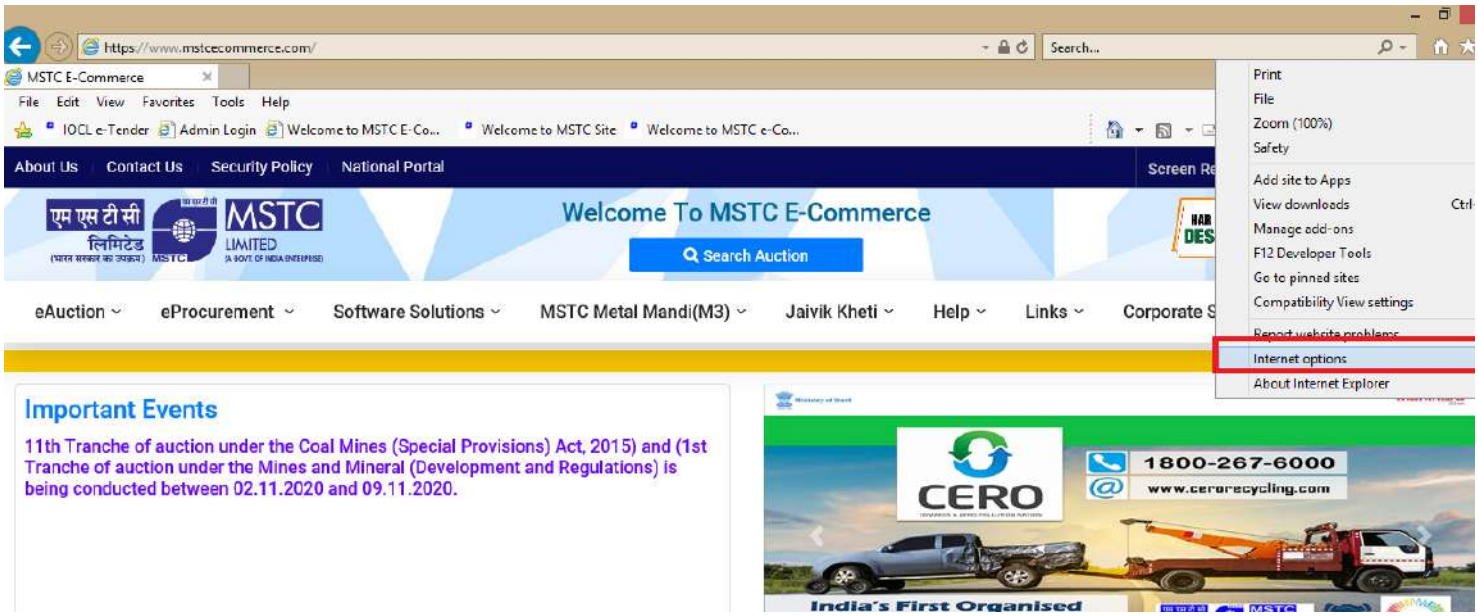
Internet Explorer Settings 3

Browser settings for Microsoft Edge: 9

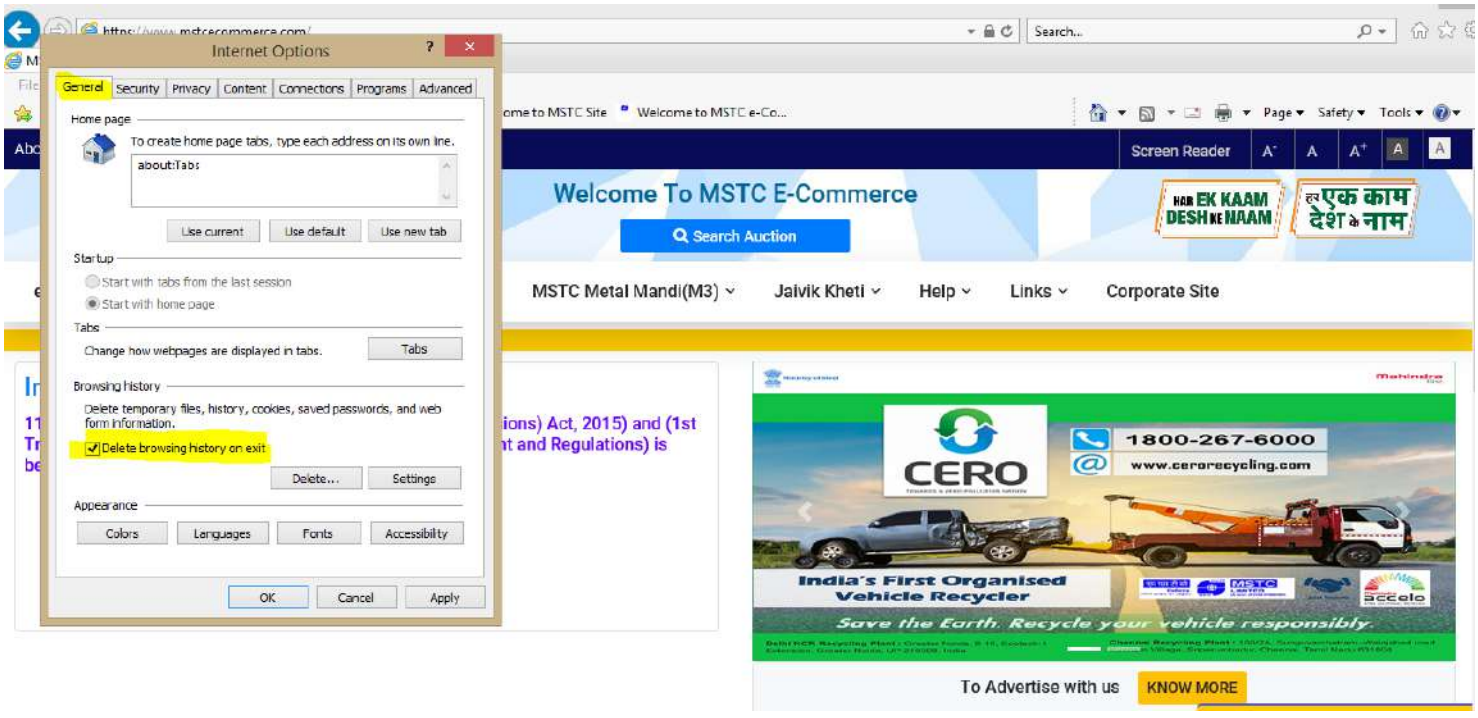
Internet Explorer Settings

(Client must request for the Enterprise application system through browsers: Internet Explorer v 10 or v 11). The following system related settings must be done for successful login and bidding:

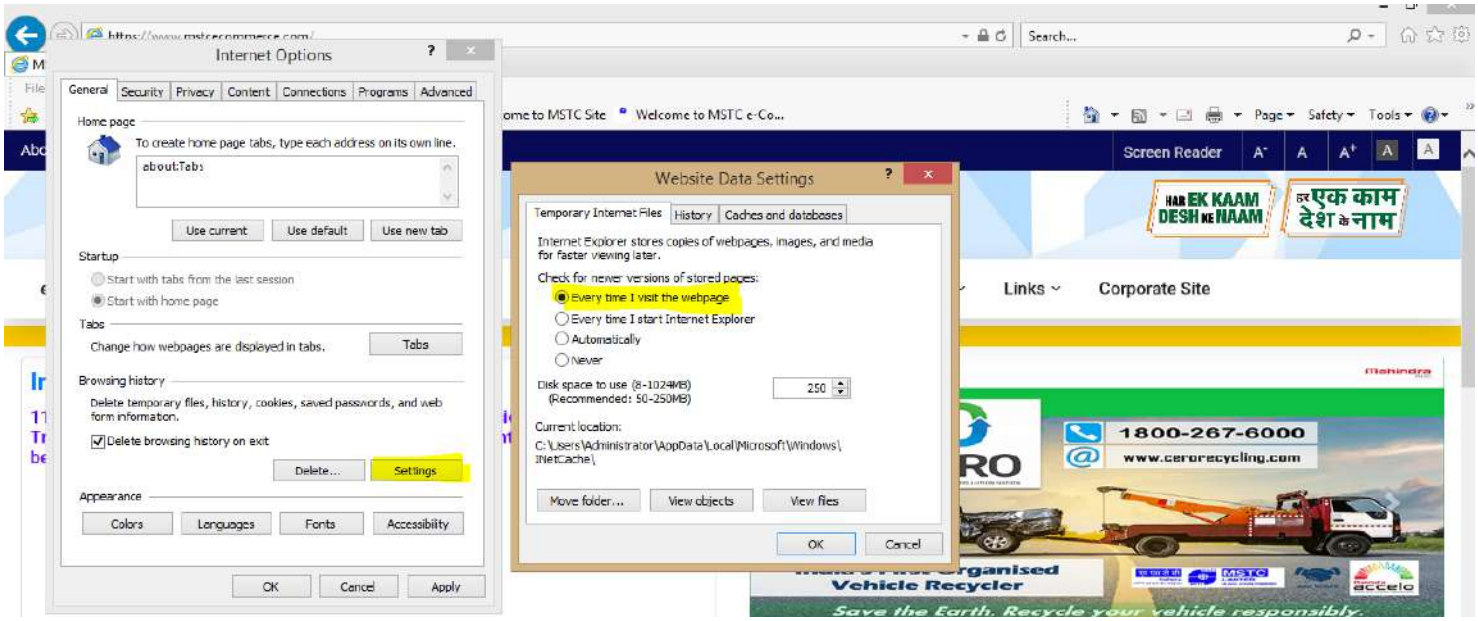
Go to Tools -> internet Options:



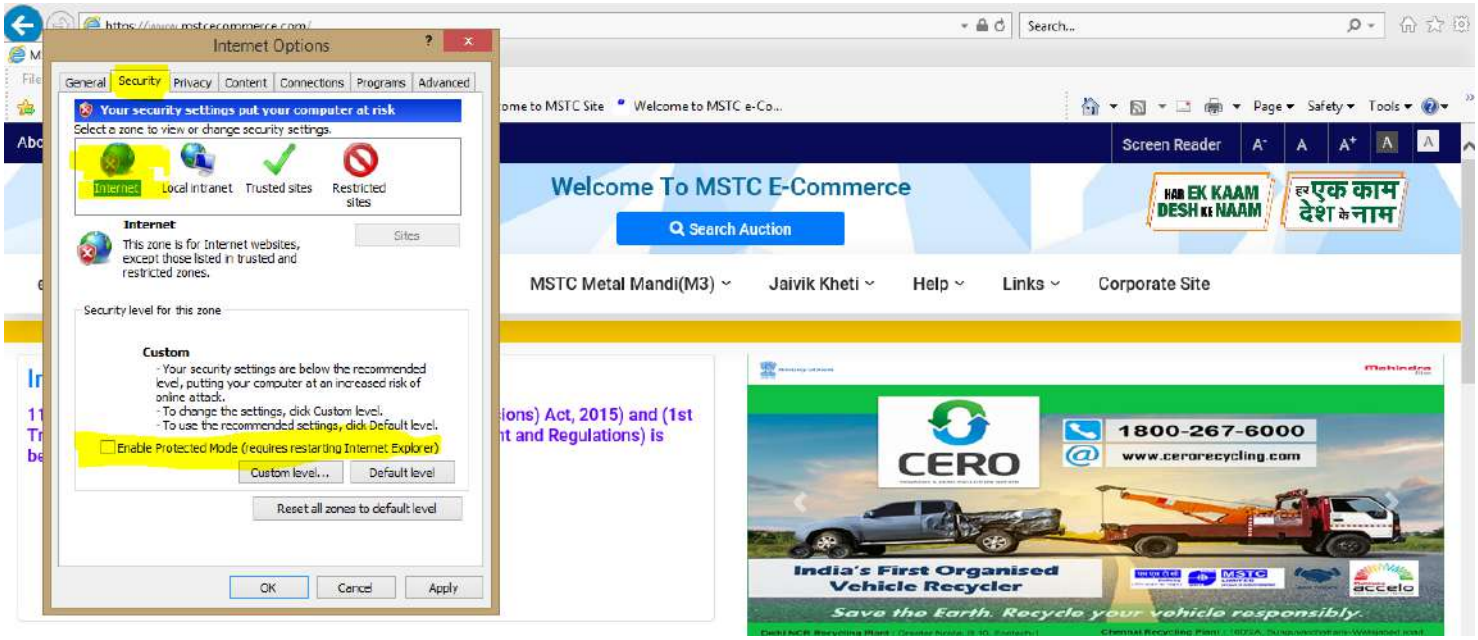
Go to **General Tab,** 'Delete Browsing history should be checked':



Click on Settings In the next pop up, the radio button 'Every time I visit the website, should be clicked

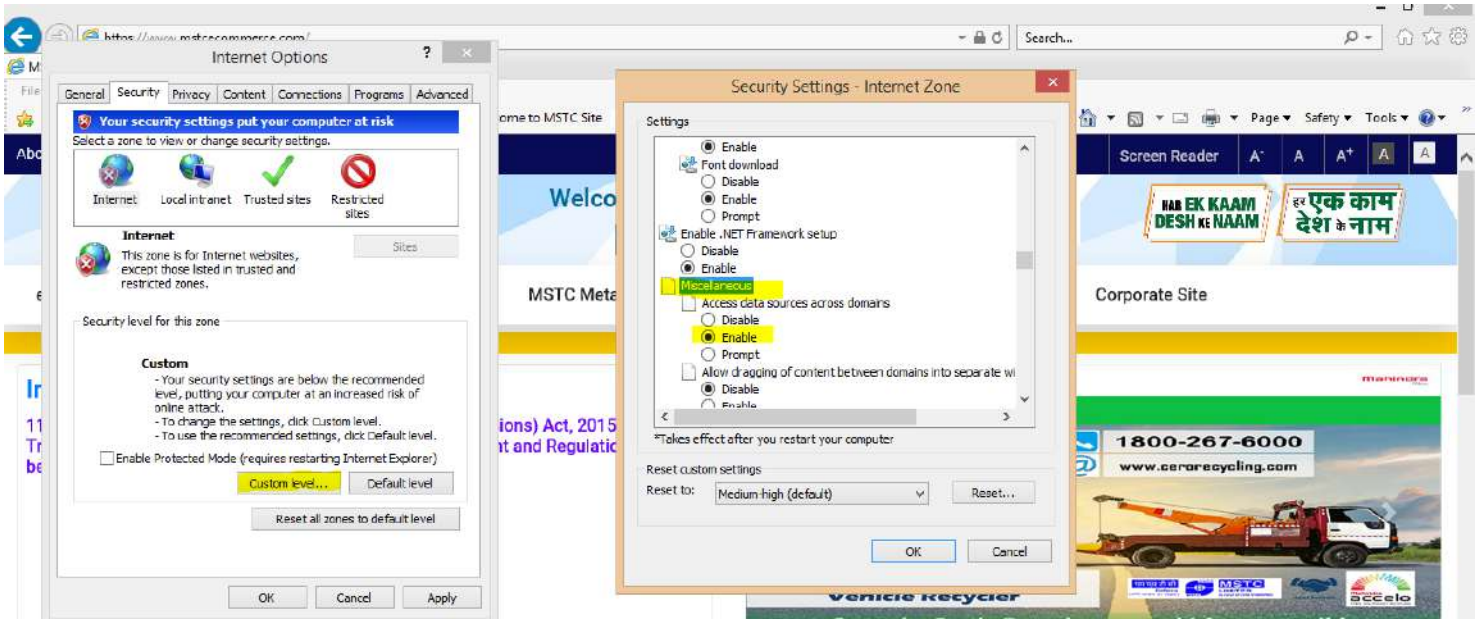


Click on '**Security**' tab followed by 'Internet' icon. Uncheck the **'Enable protected mode (requires restarting Internet Explorer)'** checkbox.

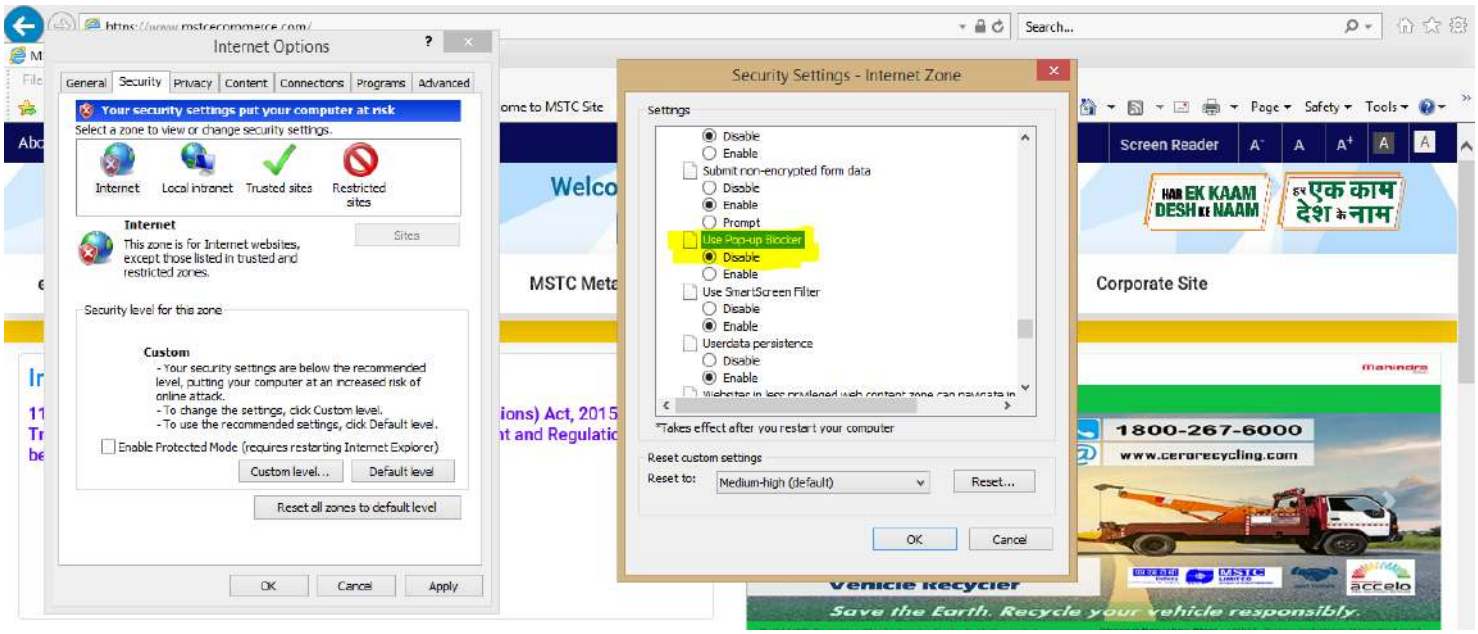


Now click on '**Custom Level…**' button:

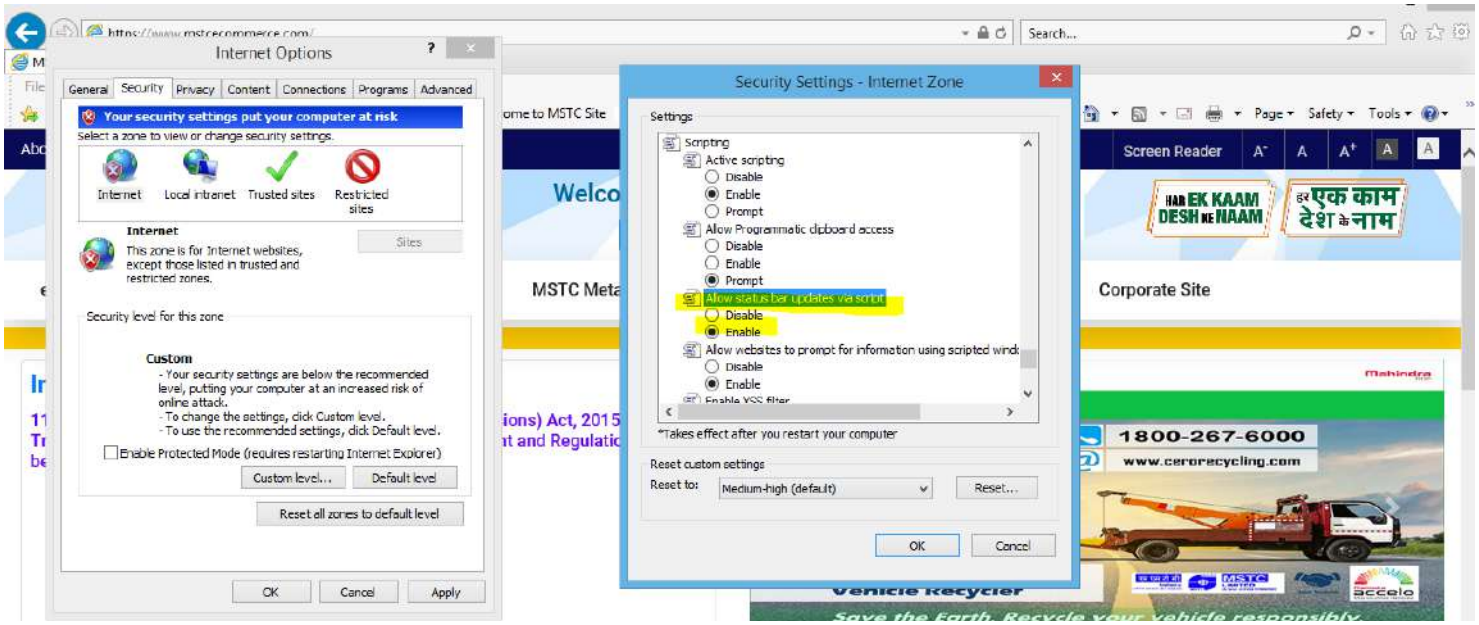
1) In the next pop up, press 'M' in the keyboard to find the 'Miscellaneous' menu item
2) 'Enabled should be' selected against this menu item.



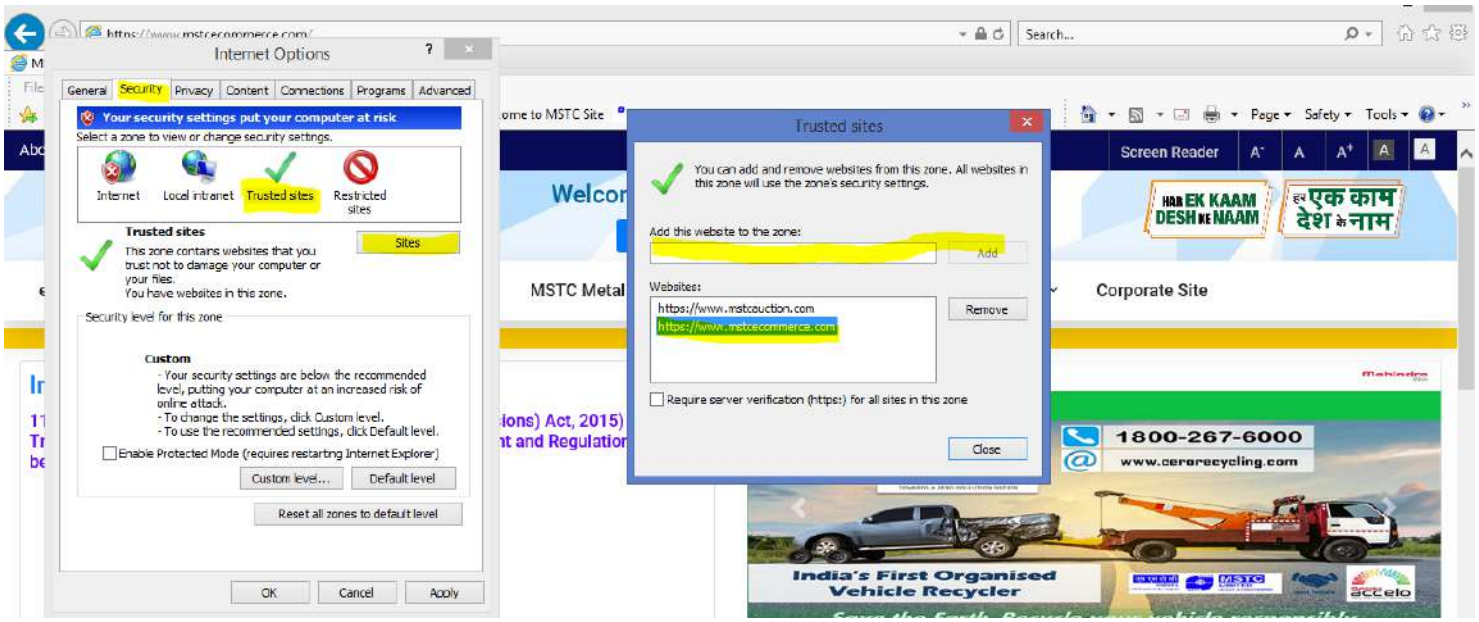
Press 'U' to find **Use pop up blocker** it should be disabled



Select **Scripting:** and the menu item **"Allow Status Bar Update Via Script"** should be enabled

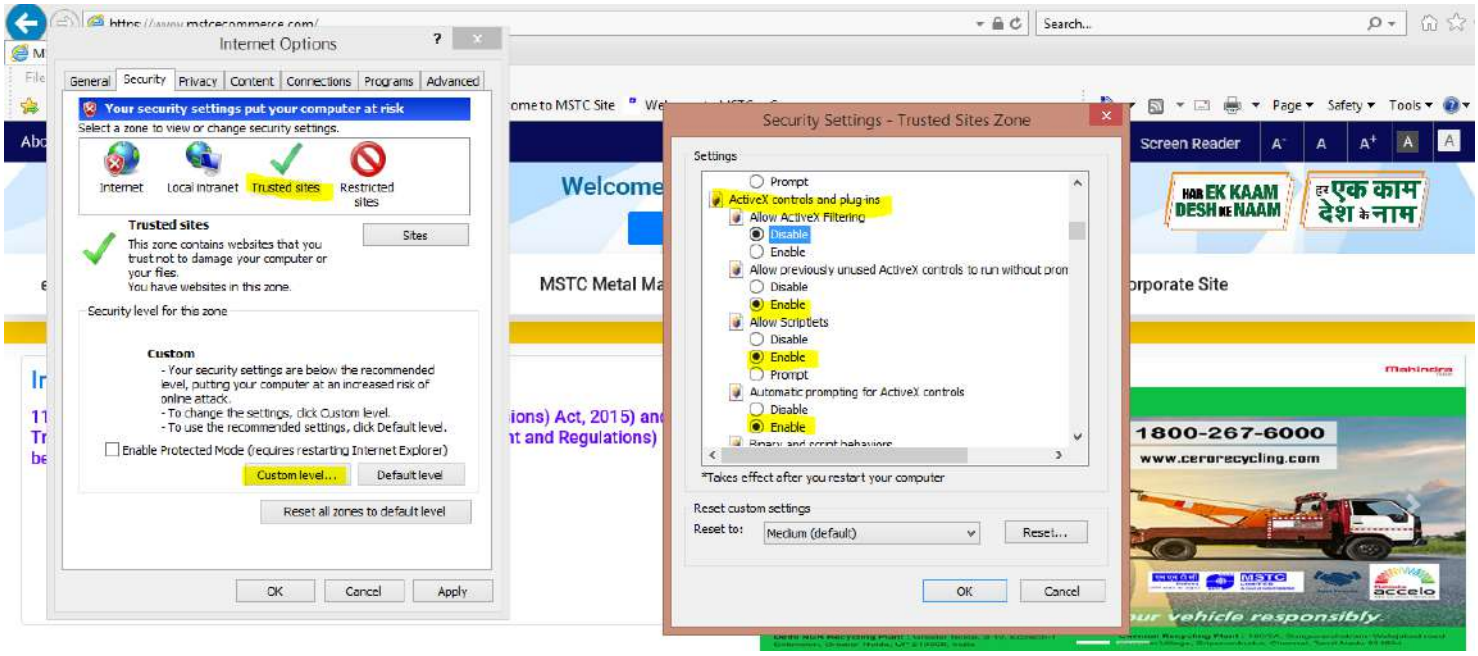


Click 'OK'. Now click on '**Trusted Site'** icon Sites. In the pop up, enter the URL: https://www.mstcecommerc.com and **Add.**

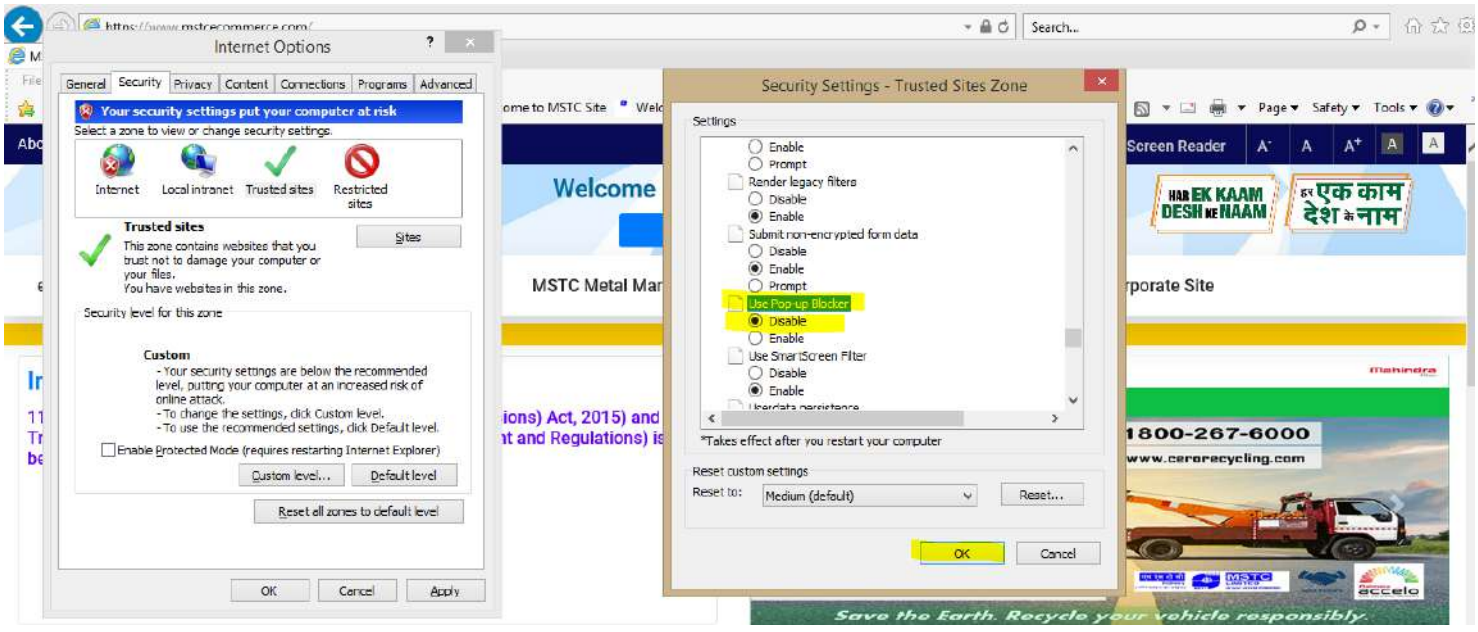


Now for **'Trusted Sites',** click on **Custom Level**.

1) Press 'A' in the keyboard to find '**Active X controls and plug-ins'.**
2) The first item i.e. 'Allow Active X filtering' should be disabled
3) All other menu items under the head 'Allow Active X filtering' should be enabled.

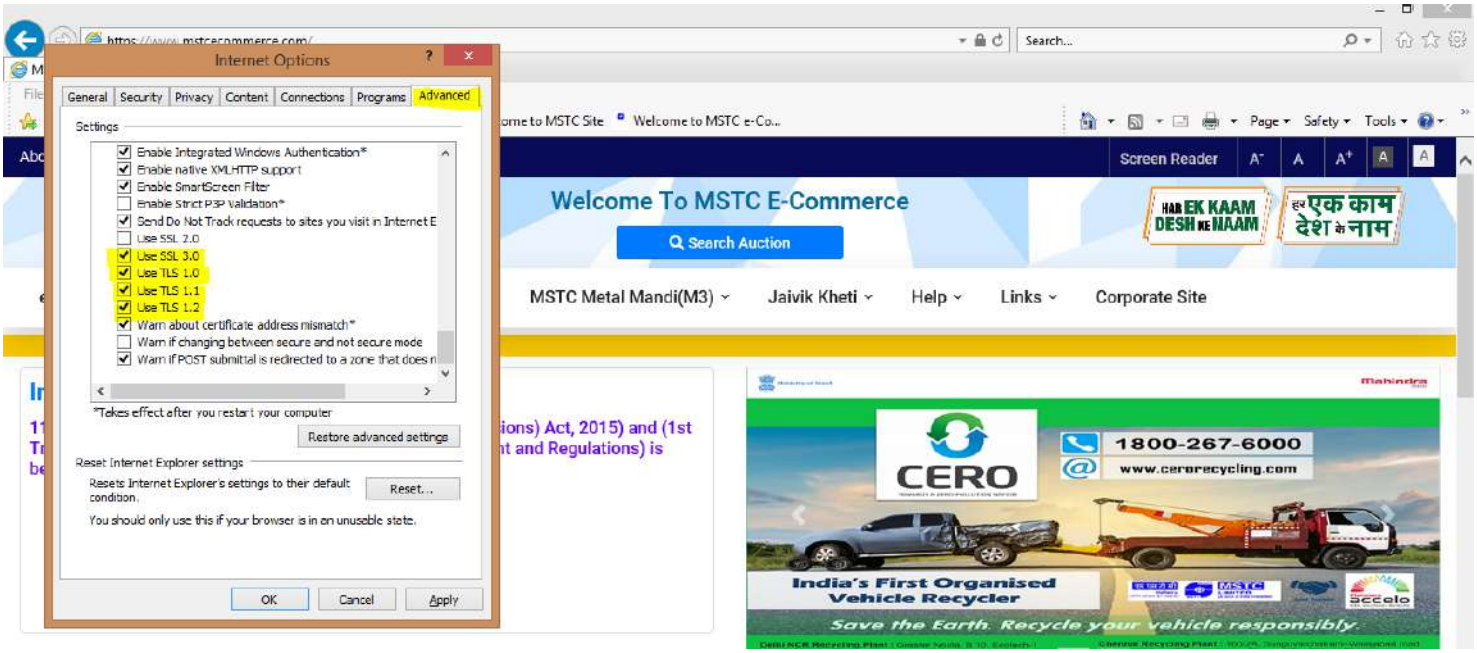


Now press ‘U’ in keyboard to search **‘Use pop up blocker’ –** It should be disabled and finally click ‘OK’.



Finally click on the **‘Advanced’** tab. All the following checkboxes should be ticked:

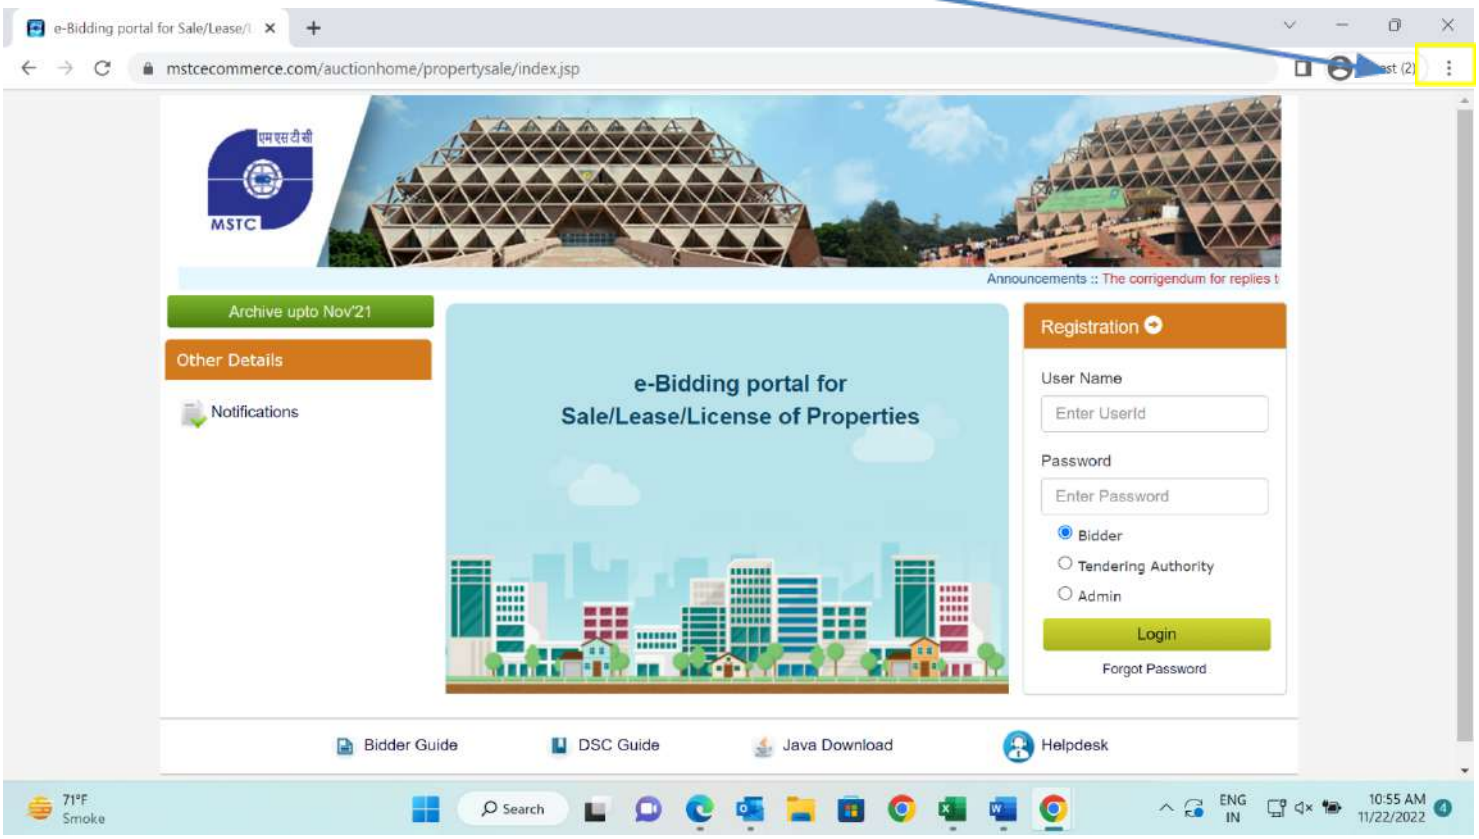
- Use SSL 3.0
- Use TLS 1.0
- Use TLS 1.1
- Use TLS 1.2
- Use TLS 1.3 (available in IE v11)



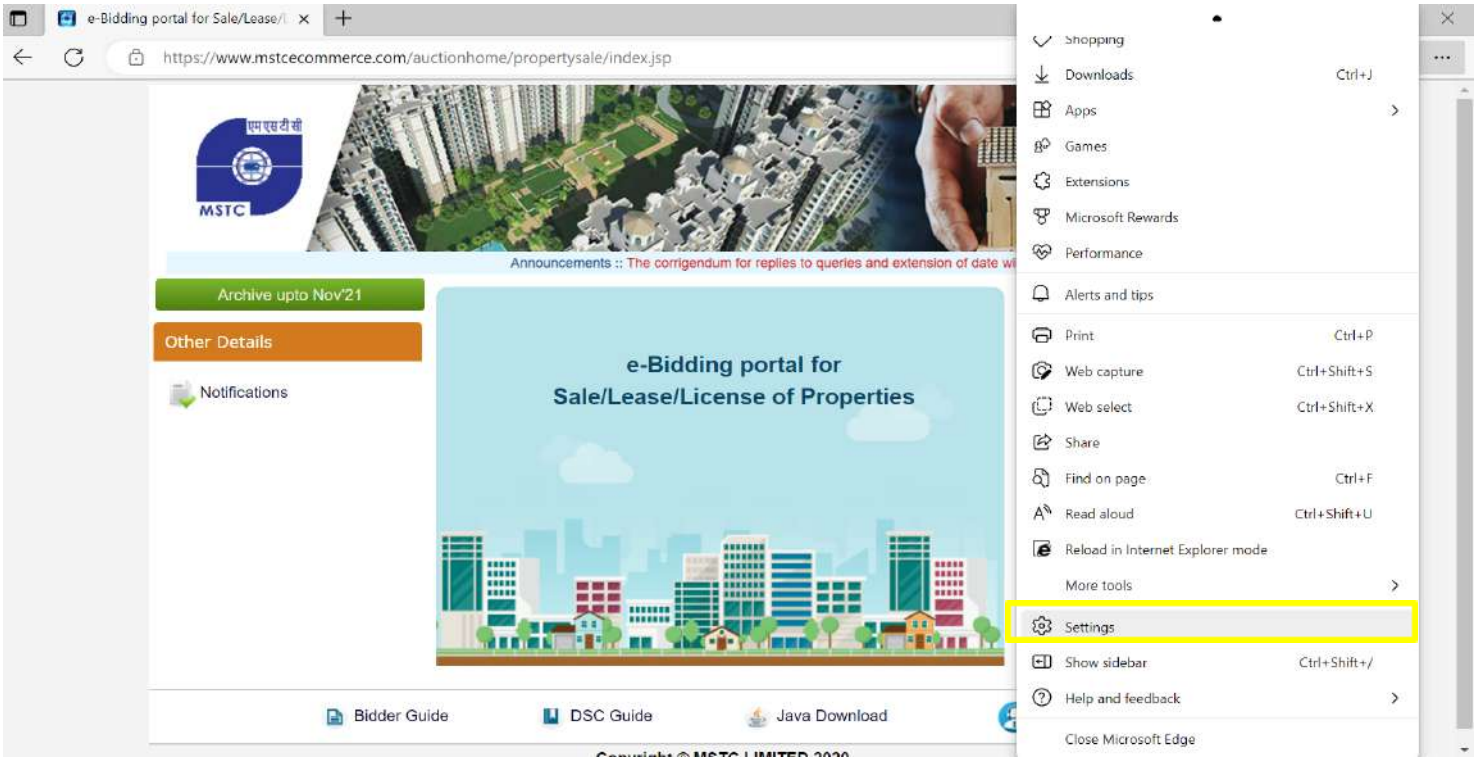
Click on ‘Apply’ and ‘OK’.

Browser settings for Microsoft Edge:

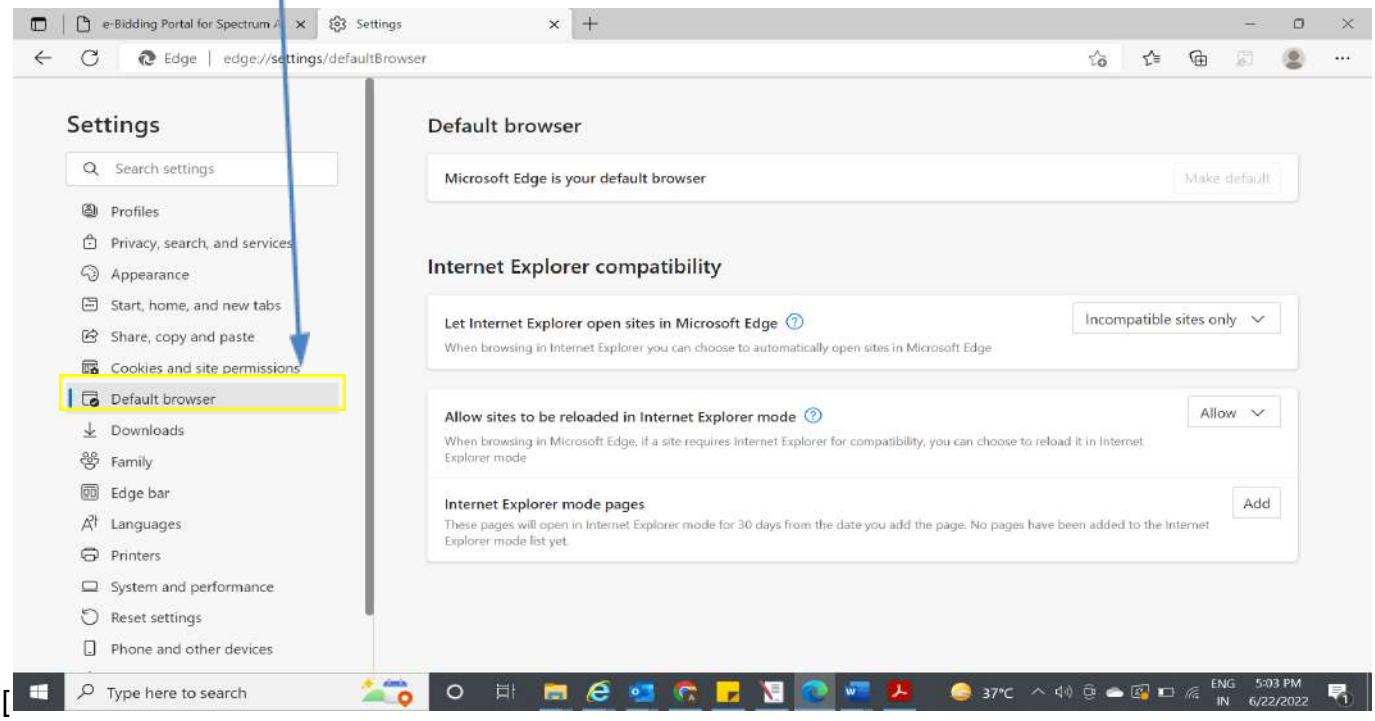
Open Microsoft Edge and click on the icon ... to open "**settings and more**"



Click on **Settings** appearing in the right pane

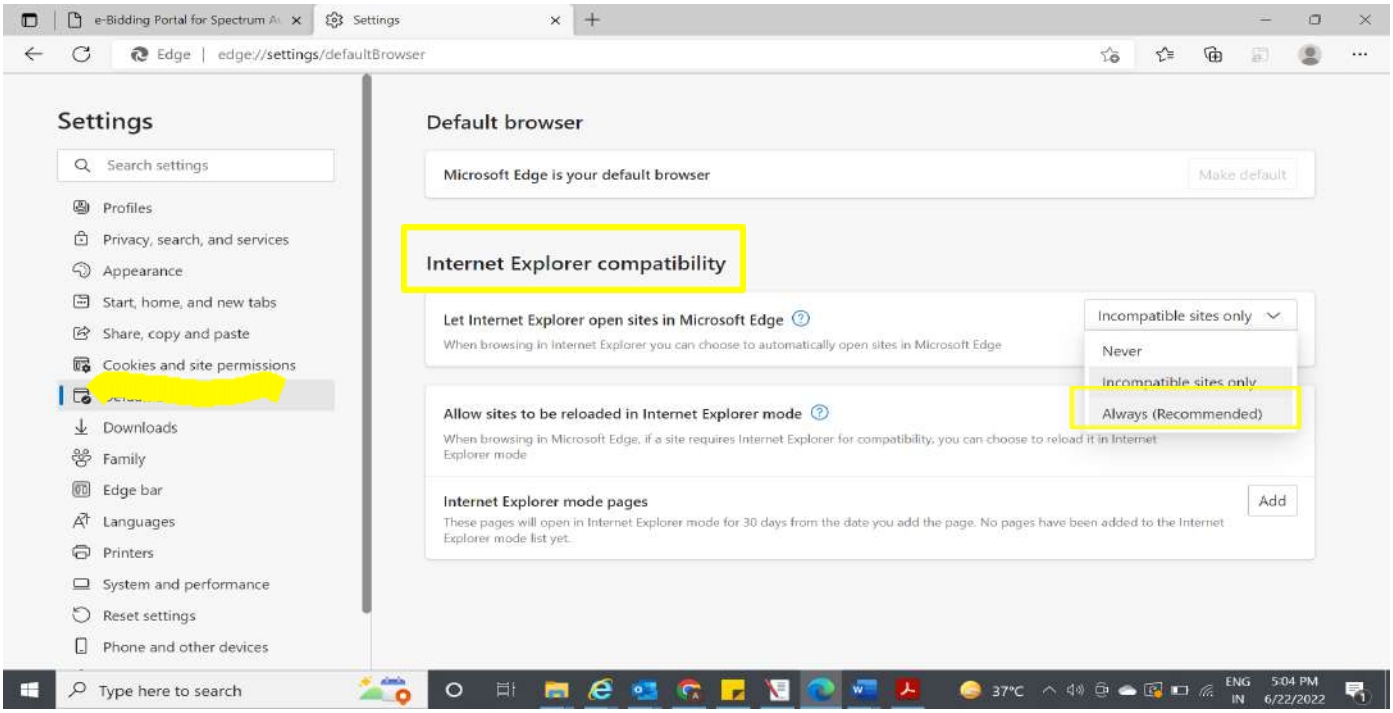


Click on "**Default browser**"

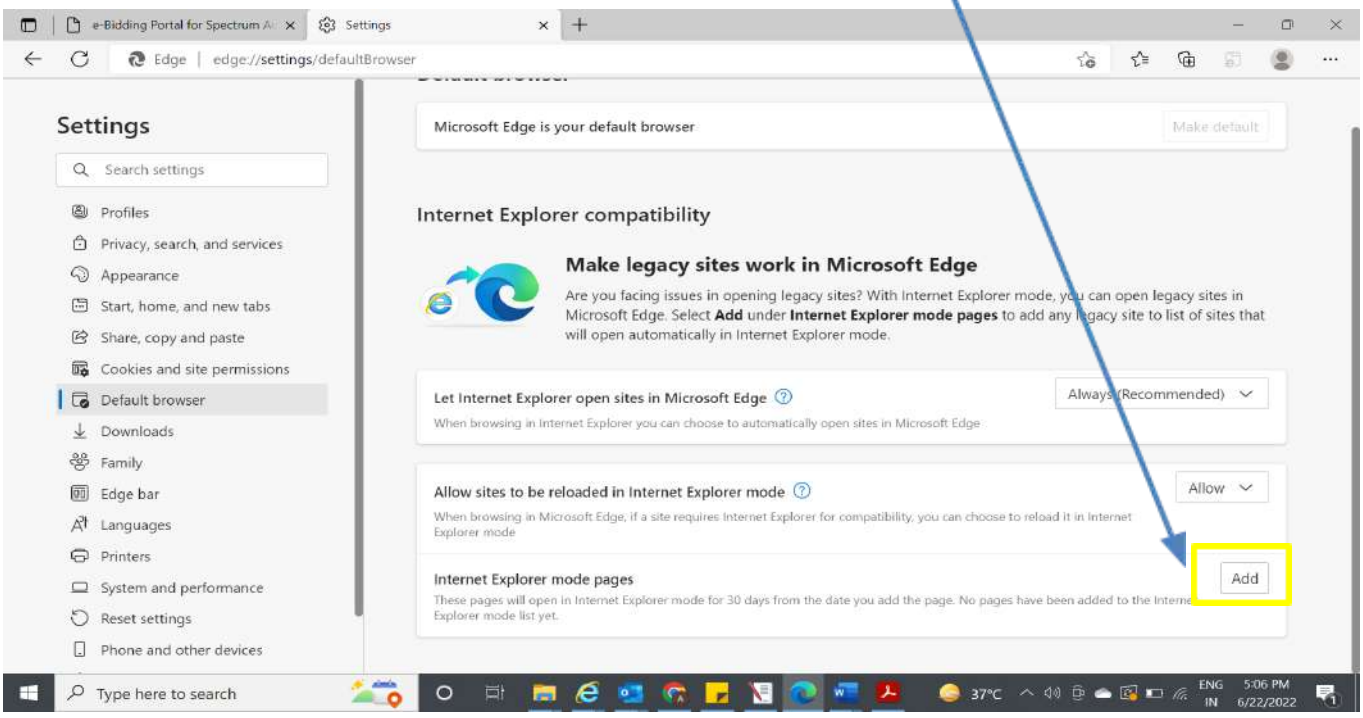


[

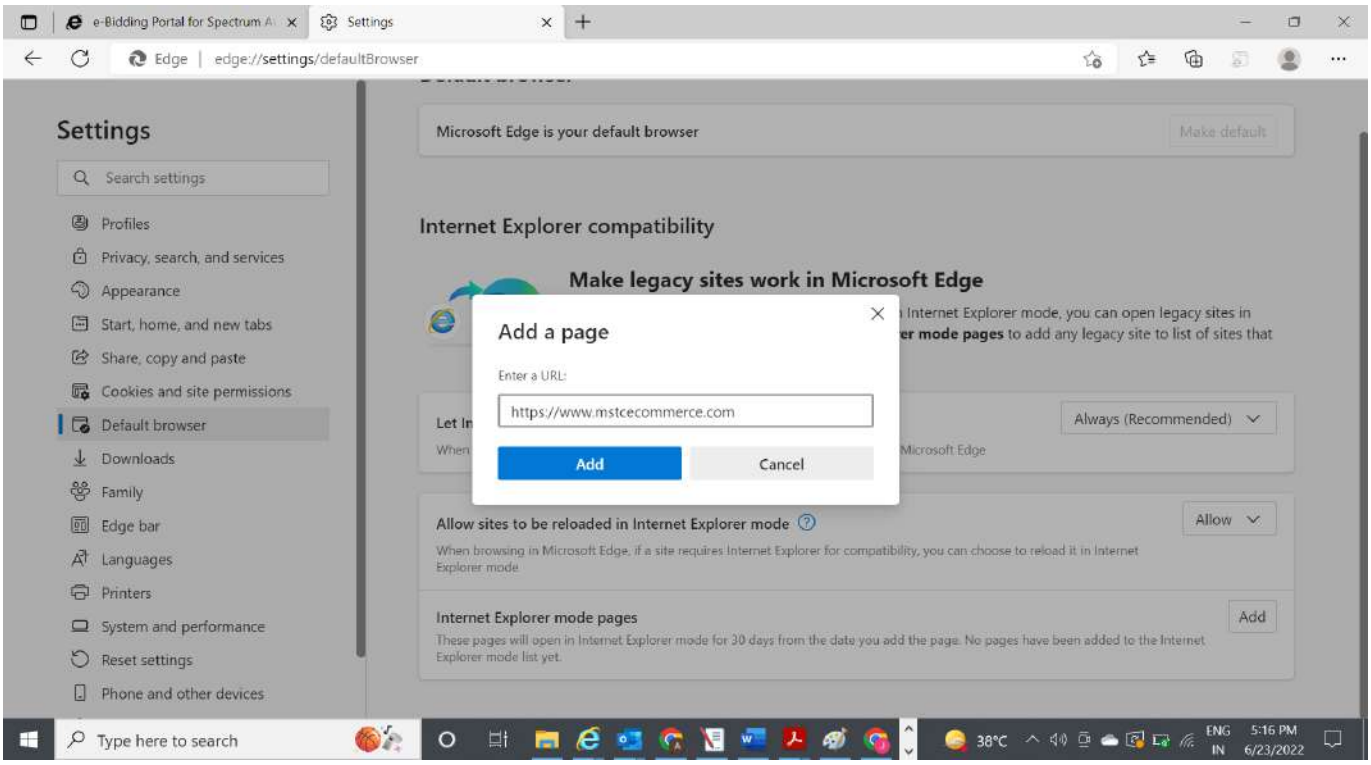
In Internet Explorer compatibility Select **Always (recommended)** from the dropdown menu available under" **Let Internet Explorer open sites in Microsoft Edge**"



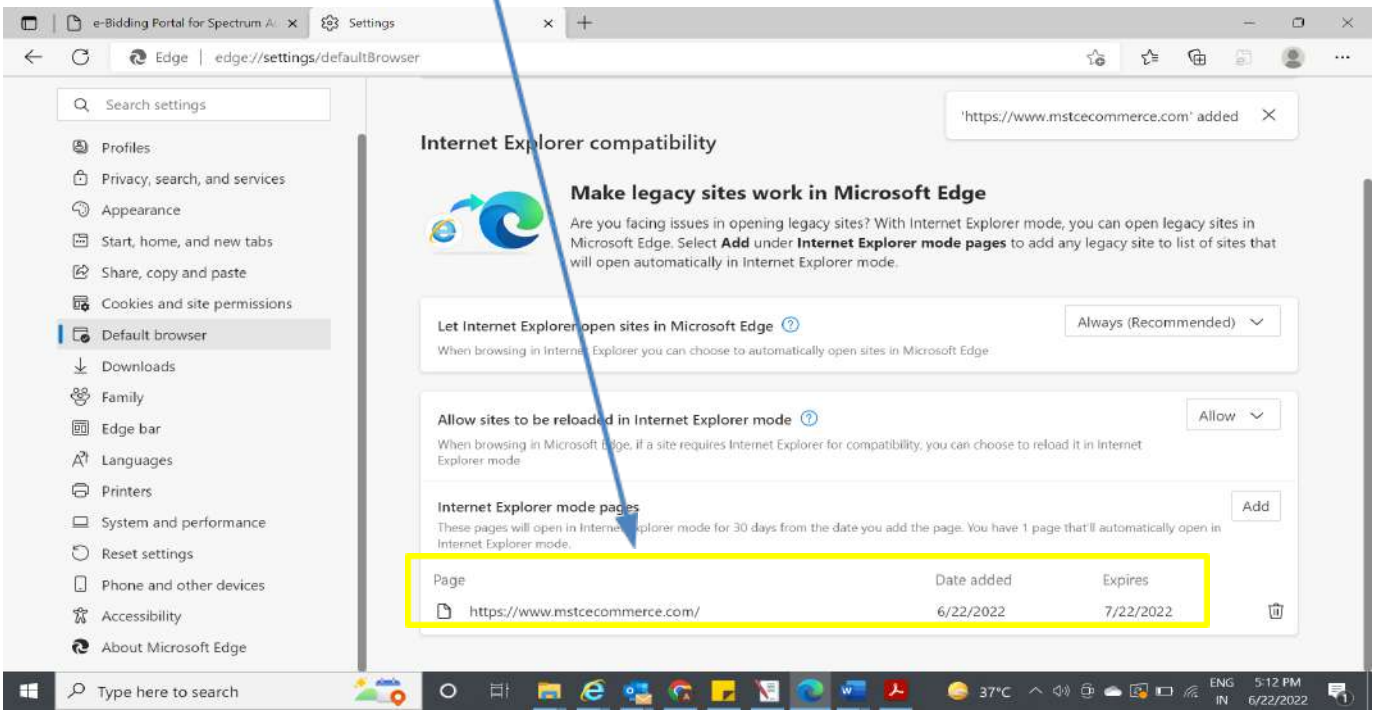
On the same screen under "**In Internet Explorer Mode pages**" Click on "**Add**" and enter the website address a https://www.mstcecommerce.com



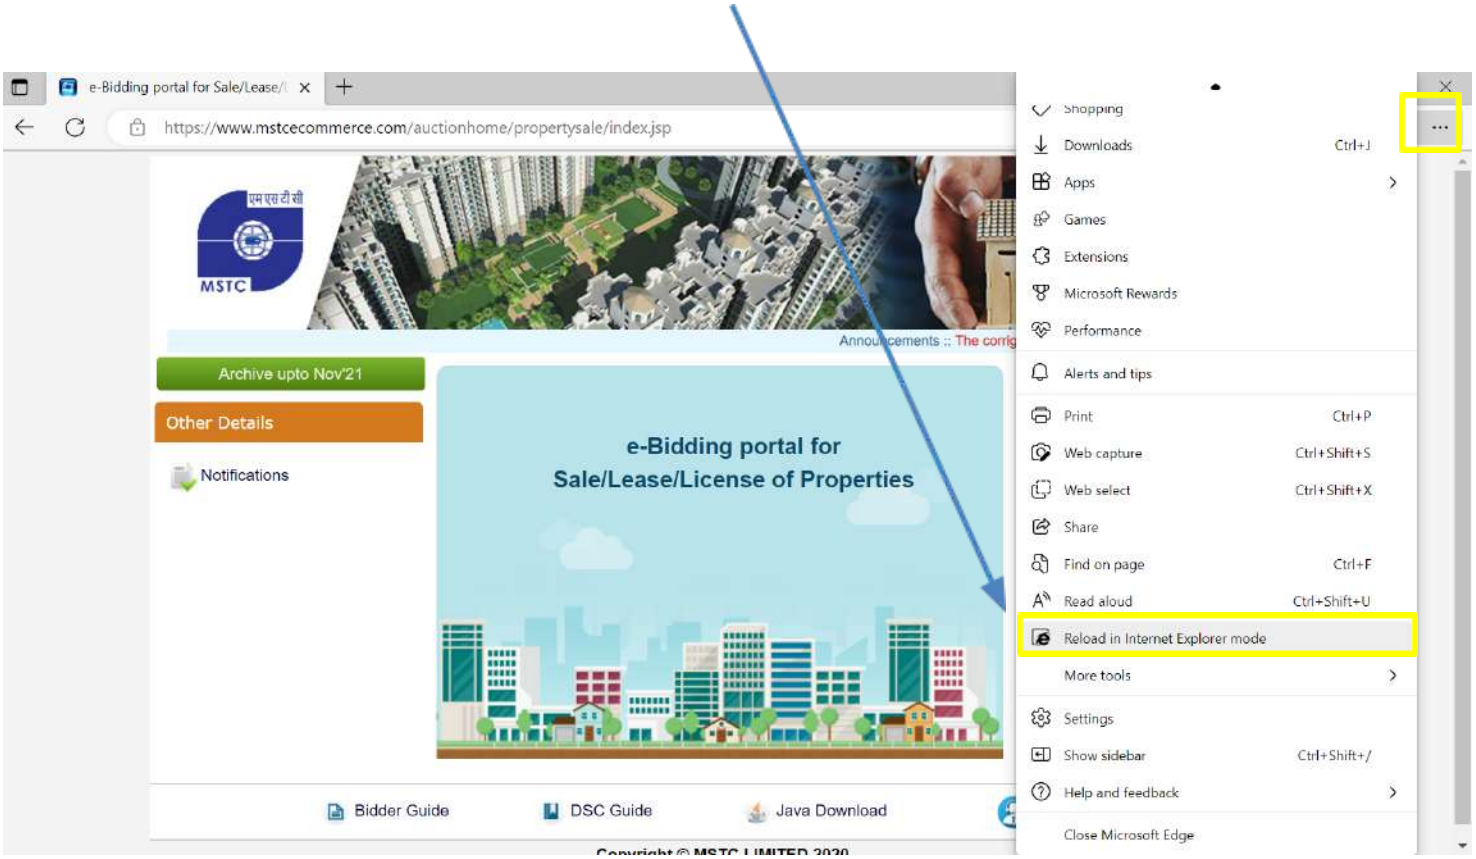
Click on "**Add**" after entering the address of the website.



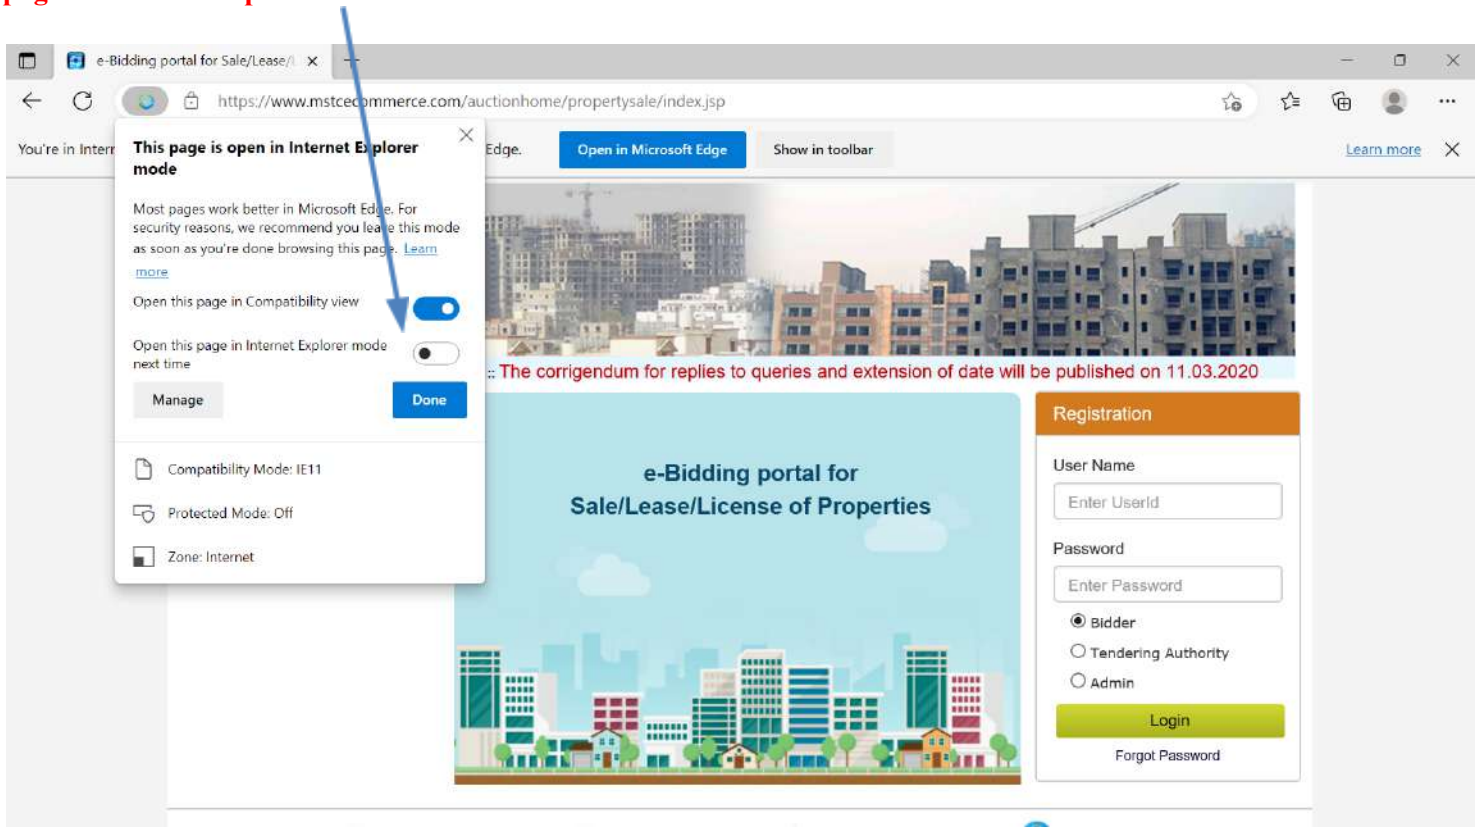
On adding the website https://www.mstcecommerce.com, it will start appearing as below:



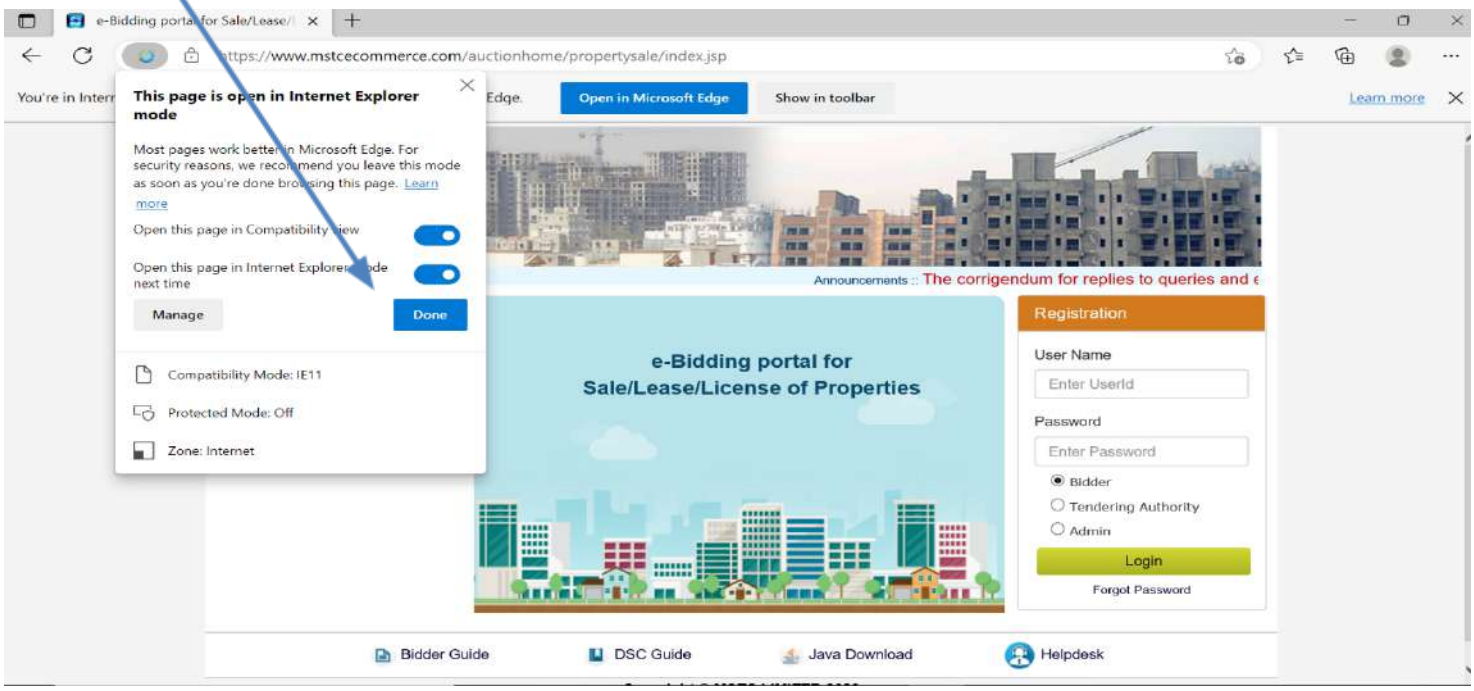
Open the Homepage at https://www.mstcecommerce.com/auctionhome/propertysale/index.jsp and click on the icon to open settings and more and click "**Reload in Internet Explorer mode**"



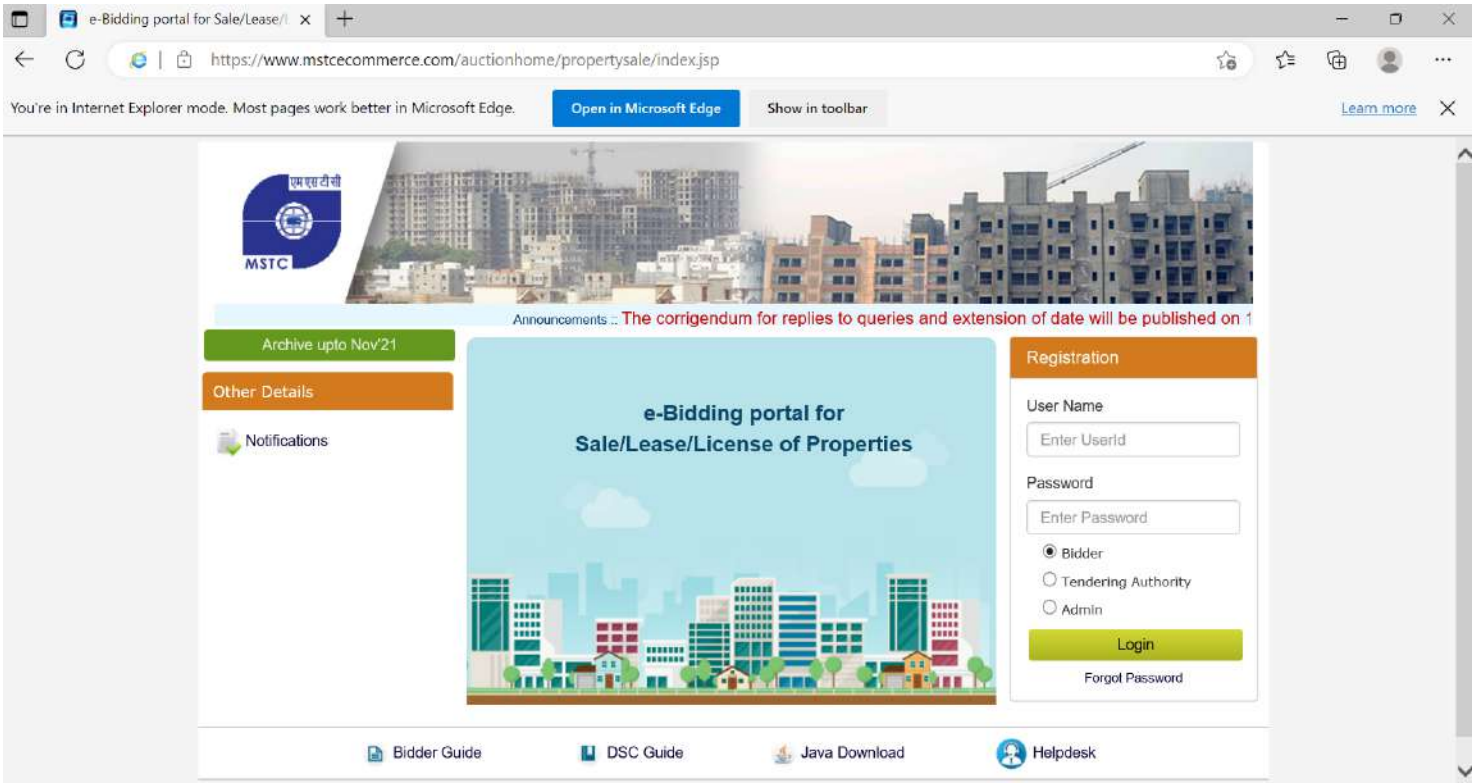
On loading the browser in Internet Explorer mode, page will display the page as below. Now drag the option "**Open this page in Internet Explorer mode next time**"



Click on "**Done**"

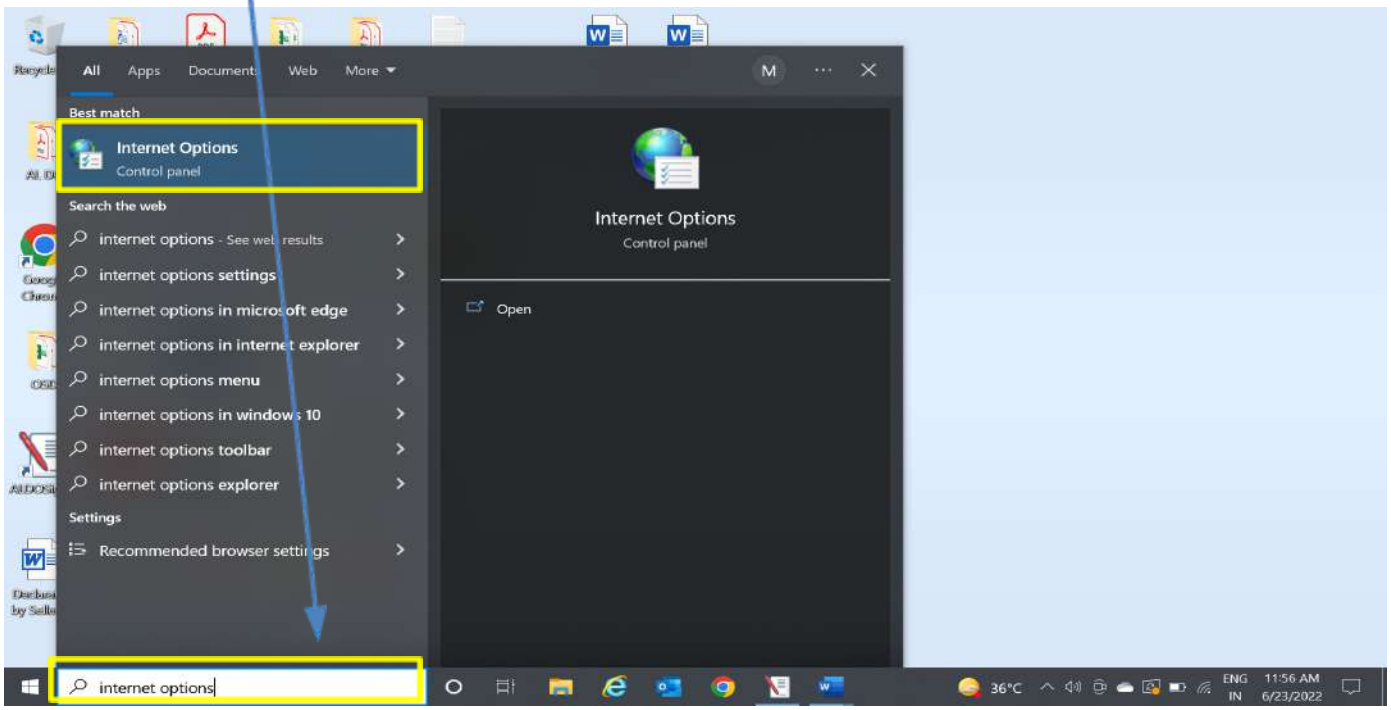


Page will now appear as below. Please make sure that you do not click on the option "**Open in Microsoft edge**" else, you will have to re load the page in Internet Explorer

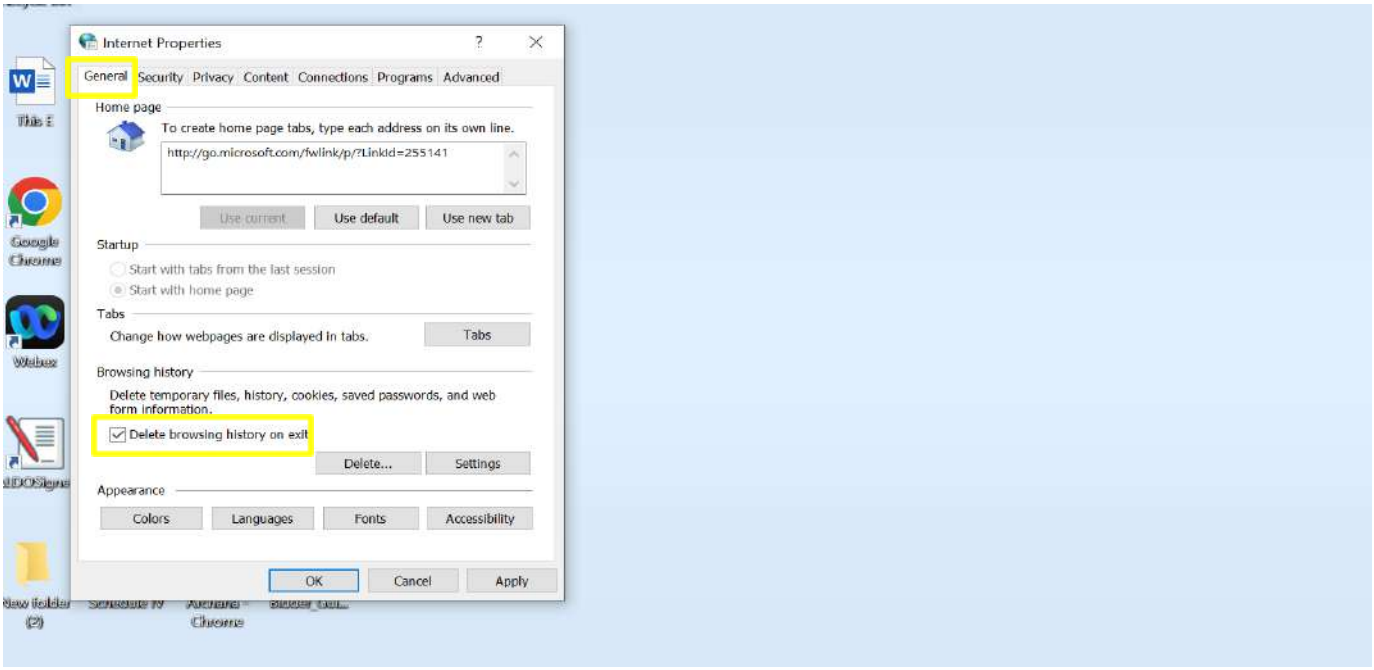


Your browser settings are completed after the above step. Now you need to align "**Internet options**" as per the requirements of the website. Follow the below steps for the same.

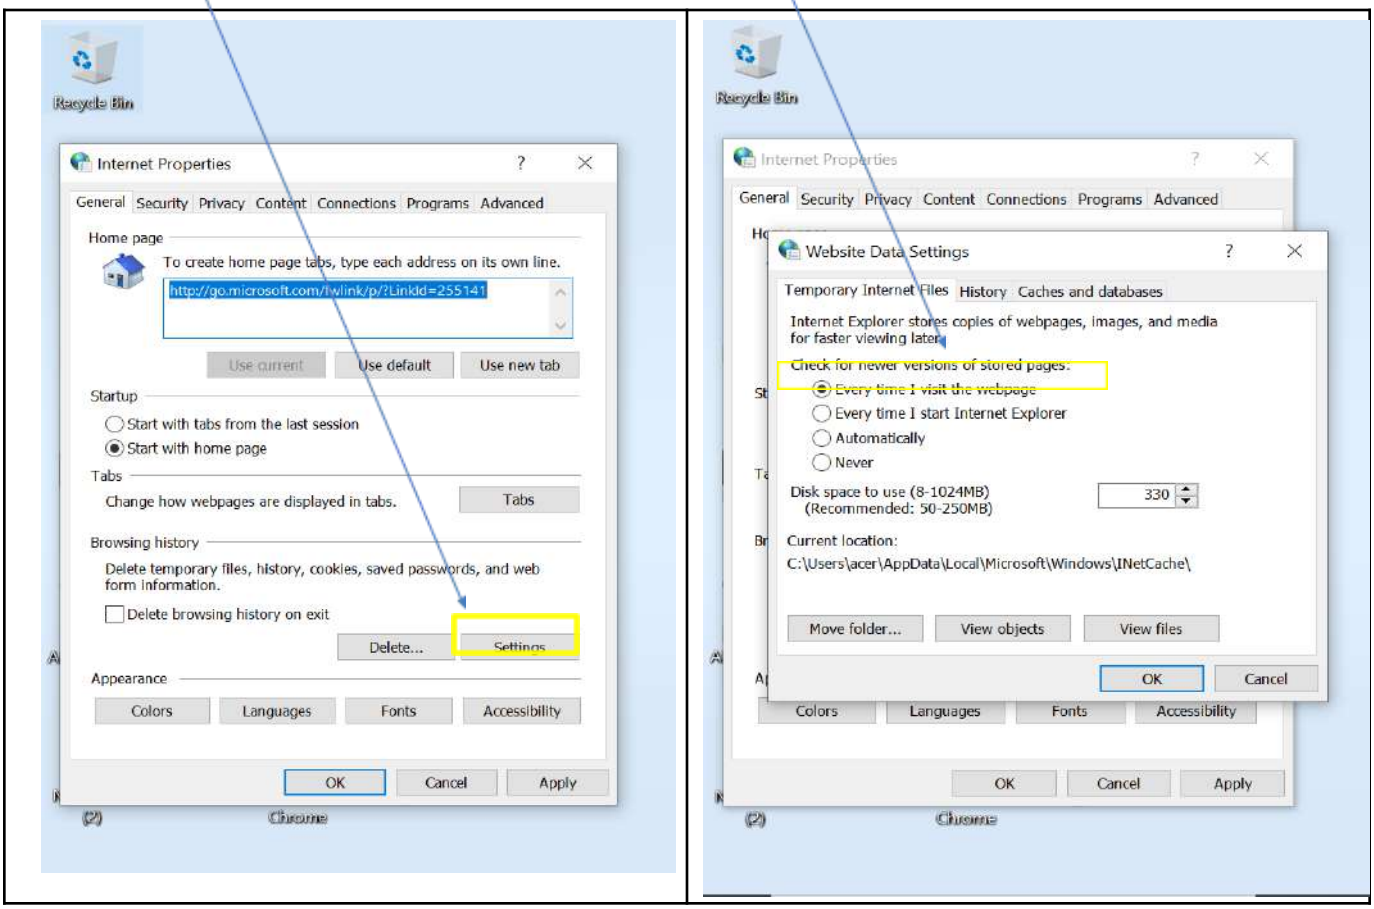
Search "**Internet Options**" in the search bar of your windows PC/Laptop and open the same to configure the other settings



A new window will get opened. Go to **General Tab**. Here, '**Delete Browsing history should be checked**':



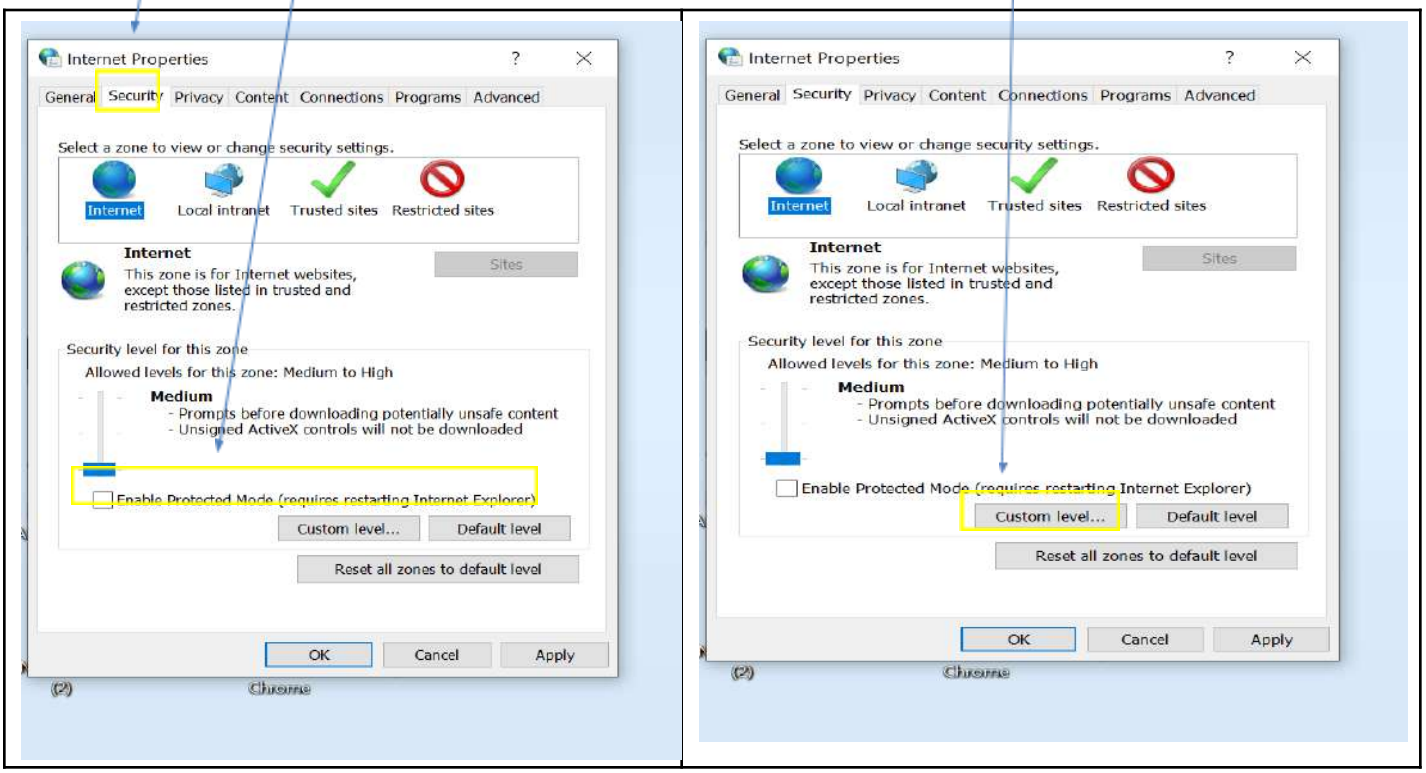
Click on **Settings** In the next pop up, the radio button '**Every time I visit the website**', should be selected.



Click on '**Security**' tab followed by '**Internet**' icon.

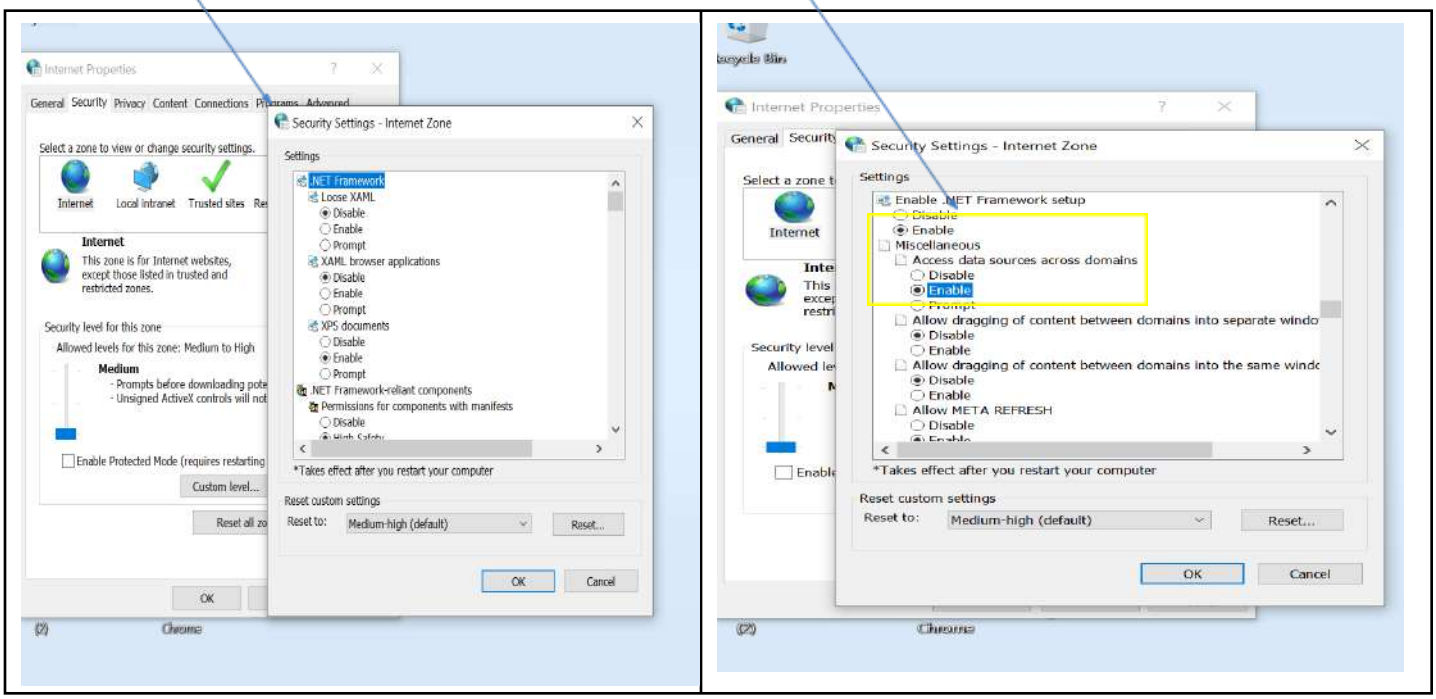
Uncheck the '**Enable protected mode (requires restarting Internet Explorer)**' checkbox if it is checked.

Now click on '**Custom Level…**' button:

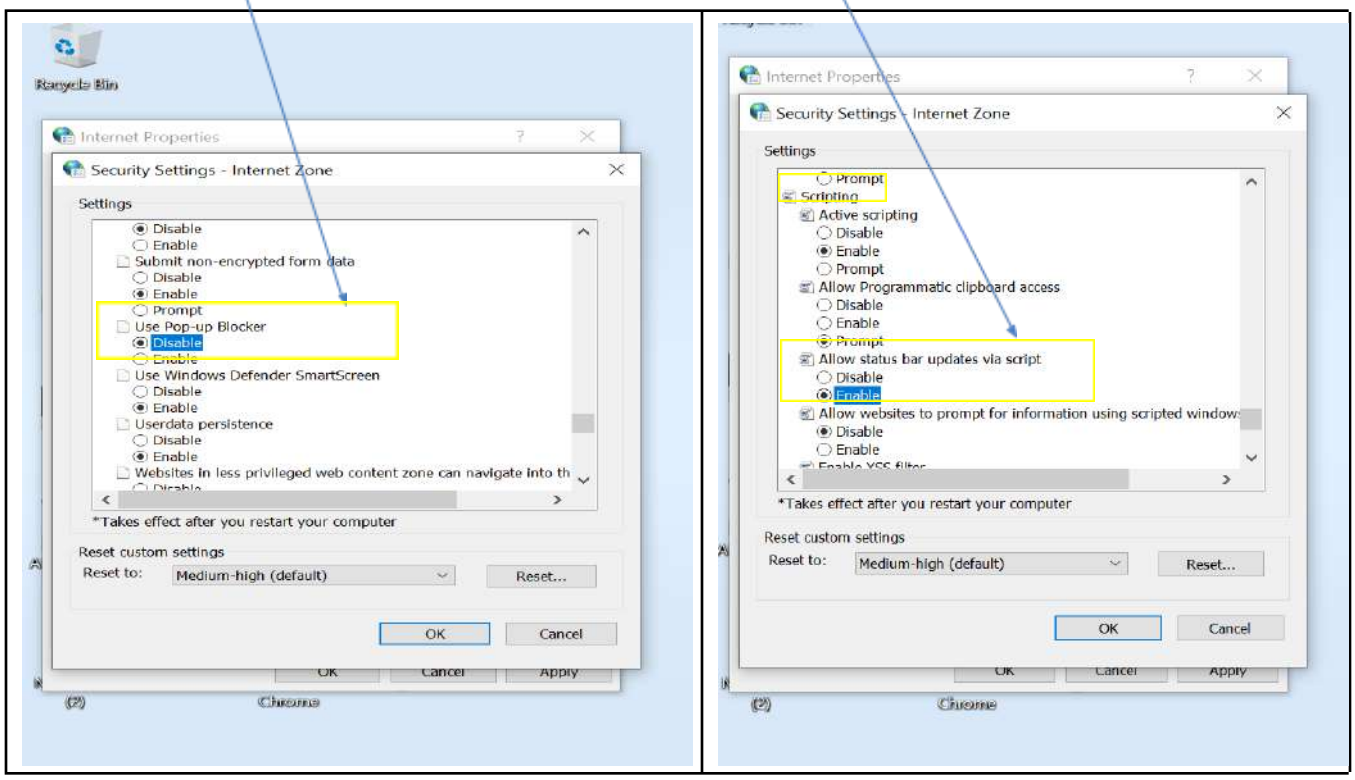


Below window will get opened after clicking on Custom level.

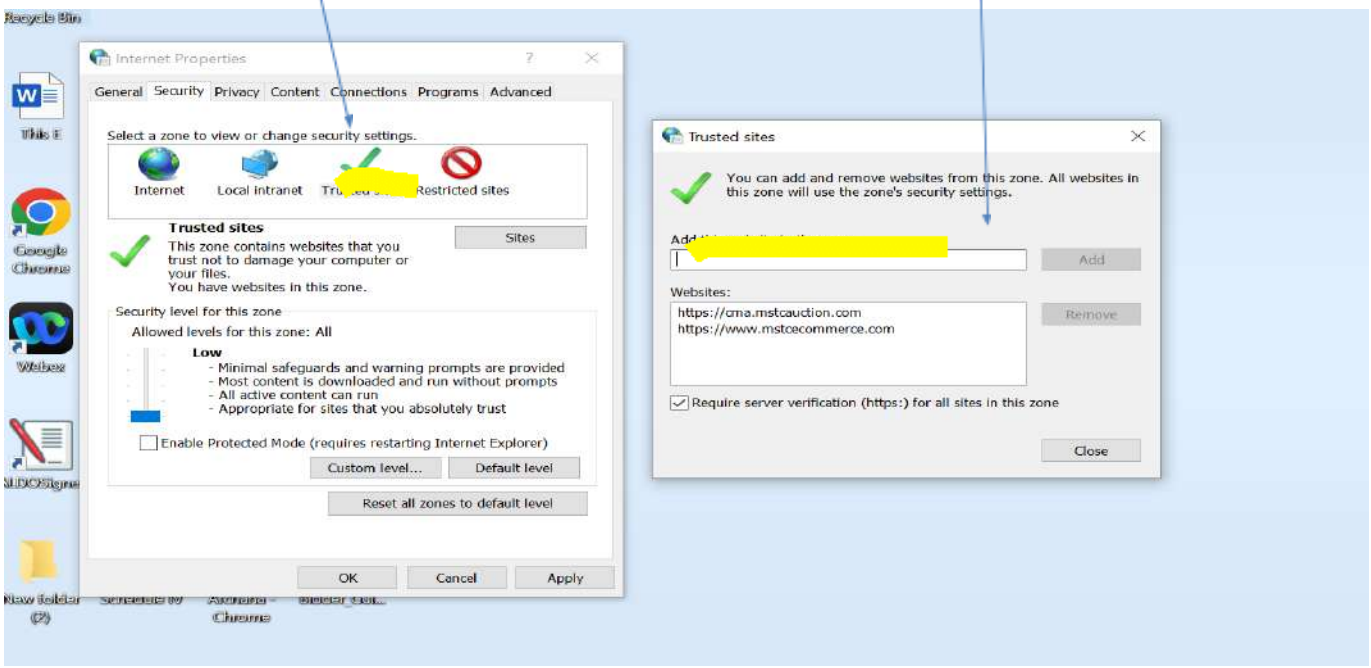
In the next pop up, press 'M' in the keyboard to find the '**Miscellaneous**' menu item. "**Access data source across domains**" should be **enabled**



Press ‘U’ to find **Use pop up blocker** it should be disabled
Under **Scripting,** the menu item **“Allow Status Bar Update Via Script”** should be enabled.
Once above settings are done. Click ‘**OK**’.

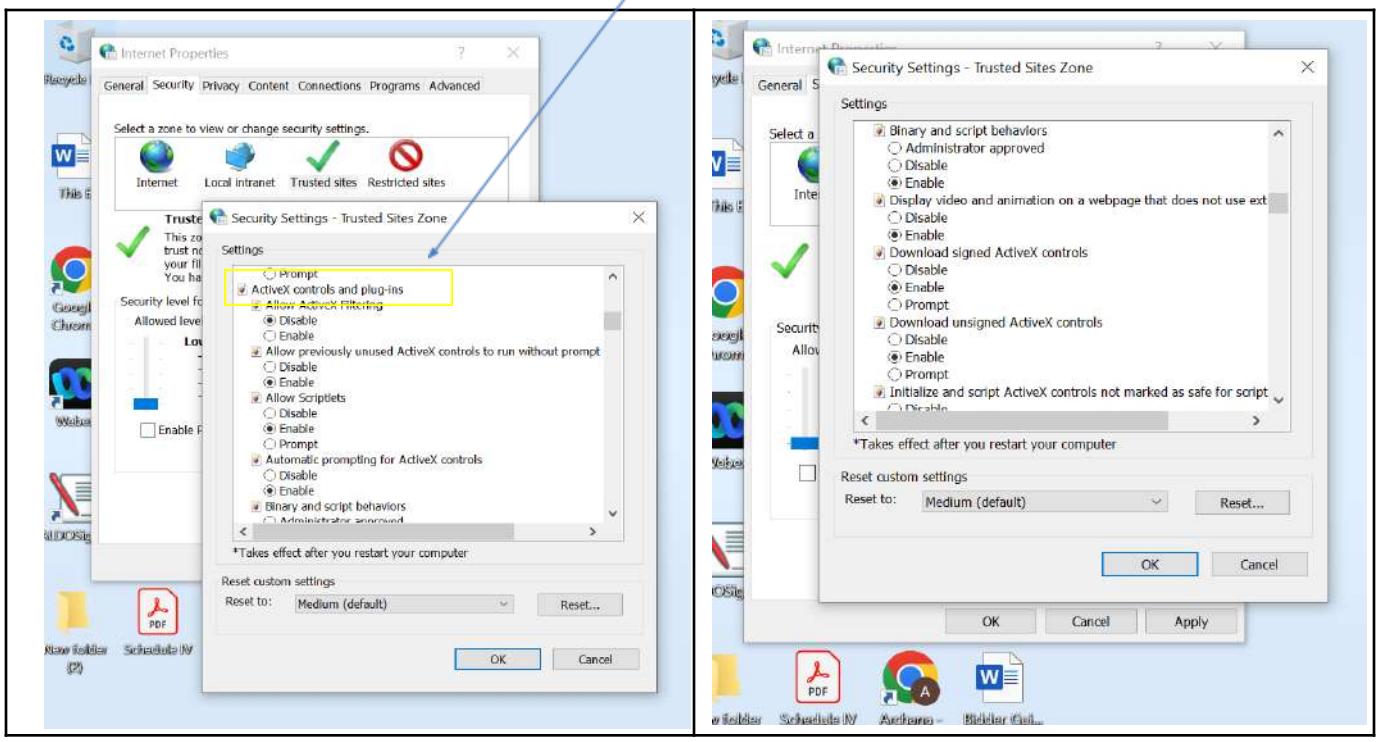


Now click on ‘**Trusted Site**’ icon Sites. In the new window, enter the URL: https://www.mstcecommerc.com and click on **Add**

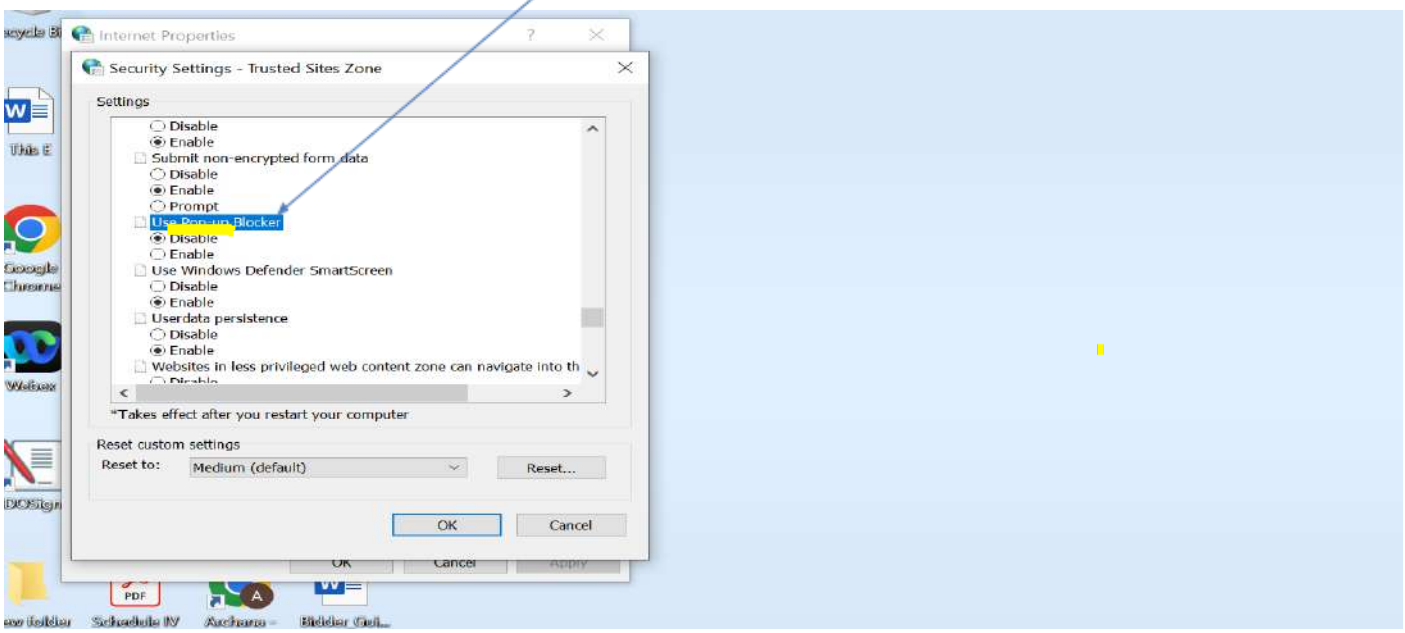


Now for **'Trusted Sites',** click on **Custom Level**.

- Press 'A' in the keyboard to find '**Active X controls and plug-ins'.**
- The first item i.e. '**Allow Active X filtering' should be disabled**
- All other menu items under the head 'Allow Active X filtering' should be enabled.

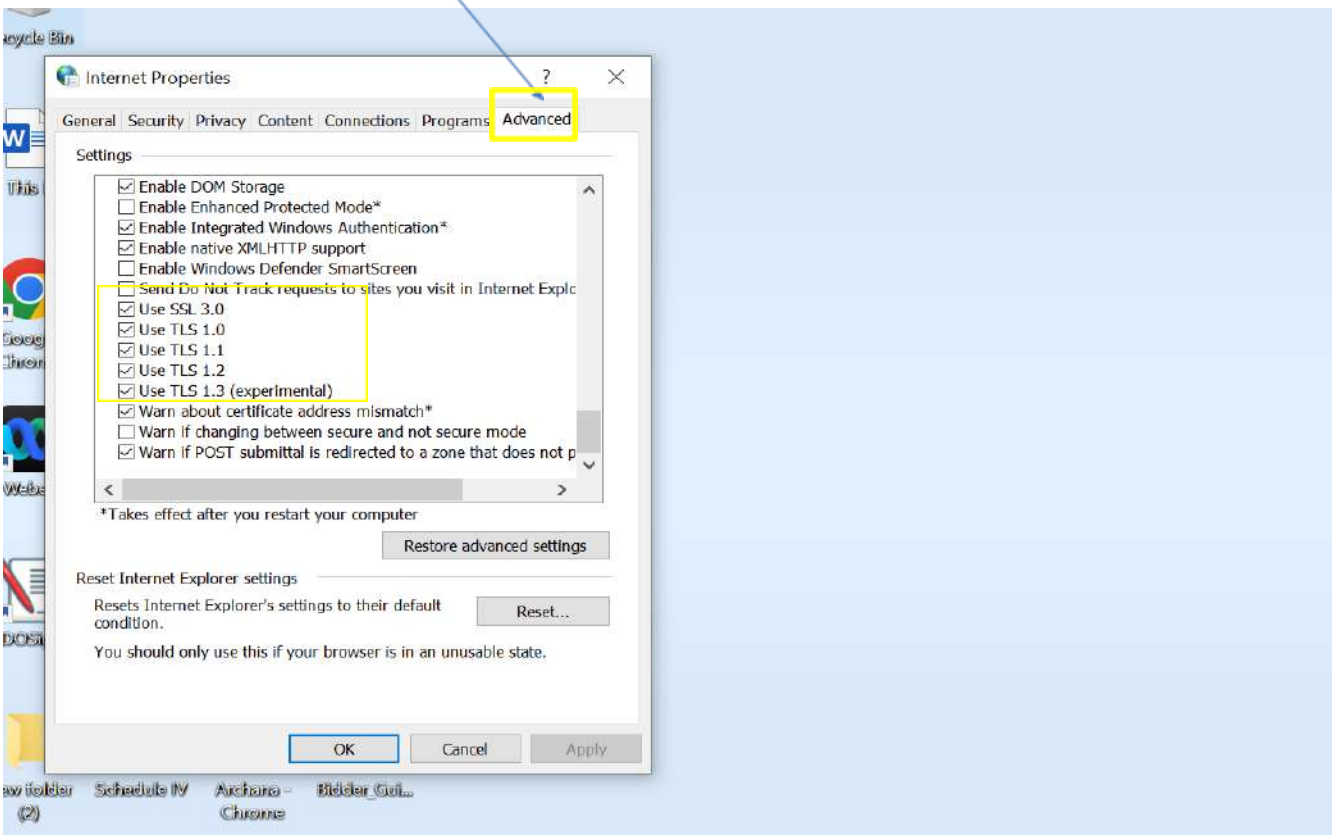


Now press 'U' in keyboard to search **'Use pop up blocker'** – It should be disabled and finally click on '**OK**'.



Click on the '**Advanced**' tab. All the following checkboxes should be **ticked:**

- Use SSL 3.0
- Use TLS 1.0
- Use TLS 1.1
- Use TLS 1.2
- Use TLS 1.3



In a new tab, type the URL: https://www.mstcecommerce.com/eprochome/SignerToolTest.jsp. In the footer of the browser, system will prompt to allow 'TSC Signer Control' and DLL AddOns. Both should be allowed. Subsequently, system will prompt to select the appropriate DSC from the pop up. Same should be done to complete the process.
